PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with hands-on experience building and deploying machine learning models, covering data preprocessing, feature engineering, model training, and real-time inference. Proficient in Python, Scikit-learn, and Flask, with a strong foundation in data analysis (SQL, Excel, Power BI) and full-stack integration for end-to-end application delivery.

EXPERIENCE

Techvolt Software Pvt. Ltd.

Jun. 2025 – Jul. 2025

Full Stack Development Intern

Coimbatore, Tamil Nadu

- Integrated **Python backend** functionality with **MySQL** databases across multiple modules for efficient data management
- Built responsive web applications using HTML, CSS, Bootstrap, and JavaScript, including user authentication and order-management workflows

BlueStock FinTech

Apr. 2026 – May 2026

Data Analyst Intern

Remote

- Analyzed financial statements of publicly listed companies, applying profitability ratios and valuation metrics on a company-assigned analytics project
- Queried and processed datasets using **SQL and Excel**, applying quantitative indicators (P/E, EPS, ROE, Revenue Growth, D/E Ratio) to build structured investment-research reports

PROJECTS

MediRisk AI | Python, Pandas, NumPy, Scikit-learn, Flask

- Built an AI-powered healthcare risk prediction system trained on **768 records across 8 features**, achieving **87% accuracy**
- Designed a full ML pipeline covering data preprocessing, feature engineering, model training, and evaluation
- Deployed the model via a Flask API with a live web interface for real-time risk scoring
- GitHub: <https://github.com/Subha-Dhanusha/medirisk-ai> | Live Demo: <http://subha-dhanusha.github.io/medirisk-ai>
- API Docs: <http://medirisk-ai.onrender.com/docs>

Network Forensic Investigation & Evidence Management System | Python, Flask, Cybersecurity

- Developed a digital forensics platform to capture, analyze, and preserve network traffic as court-admissible evidence
- Built chain-of-custody tracking, packet-level analysis, and structured incident-reporting workflows
- GitHub: <https://github.com/Subha-Dhanusha/Network-Forensic-Investigation-and-evidence-management-system>
- Live Demo: <https://nfies-web.onrender.com/>

Stock Market Fundamental Analysis System | SQL, Excel, Financial Analysis

- Evaluated companies listed on the stock exchange using key valuation ratios (P/E, EPS, ROE, Revenue Growth, D/E Ratio) during the BlueStock FinTech internship

EDUCATION

Ramco Institute of Technology

Expected May 2027

B.Tech in Artificial Intelligence and Data Science

Anna University

- CGPA: 8.28/10.0 | Highest Semester GPA: 8.91 | Class XII: 87.67% (2023)

SKILLS

Machine Learning : Scikit-learn, Feature Engineering, Model Training & Evaluation, Predictive Modeling

ML/Data Tooling : Pandas, NumPy, Docker, Flask (Model Deployment)

Data Analysis & Visualization : SQL, Excel (Advanced), Power BI

Programming & Web : Python, Java, C, JavaScript, SQL, HTML5/CSS3, React.js

Databases & Tools : MySQL, PostgreSQL, MongoDB, GitHub, VS Code, XAMPP

ACHIEVEMENTS

- Secured **First Place** in a Code Debugging Contest at Ramco Institute of Technology; recognized as **Department Topper** for three consecutive semesters
- Served as **Secretary** of the Neoteric AI Association
- Served as **Joint Secretary** of the Department of Artificial Intelligence and Data Science

CERTIFICATIONS

- Machine Learning Fundamentals – Infosys Springboard
- Introduction to Deep Learning – Infosys Springboard
- Python for Data Science – Infosys Springboard
- Data Analytics Certification – NASSCOM FutureSkills Prime (Wipro)
