PROFESSIONAL SUMMARY

AI and Data-focused engineering student pursuing B.Tech in Artificial Intelligence and Data Science, with hands-on experience in Python, Java, SQL, machine learning, data engineering, and application development. Experienced in data preprocessing, feature engineering, predictive modeling, ETL, database integration, and API-based deployment. Strong foundation in OOP, data structures, EDA, data modeling, CSV/JSON processing, cloud platforms, Git, and Jupyter Notebook.

EXPERIENCE

BlueStock FinTech

Data Analyst Intern

Apr. 2026 – May 2026

Remote

- Analyzed financial statements of publicly listed companies using SQL and Excel to identify trends and generate structured insights
- Queried, processed, validated, and transformed financial datasets using SQL-based analytical workflows
- Applied P/E, EPS, ROE, Revenue Growth, and D/E Ratio metrics to build structured investment-research reports

Techvolt Software Pvt. Ltd.

Full Stack Development Intern

Jun. 2025 – Jul. 2025

Coimbatore, Tamil Nadu

- Integrated Python backend functionality with MySQL across multiple application modules for efficient data management
- Developed responsive web applications using HTML, CSS, Bootstrap, and JavaScript with authentication and order-management workflows
- Designed relational database schemas and implemented CRUD operations with data consistency and validation

PROJECTS

MediRisk AI

Python, Pandas, NumPy, Scikit-learn, Flask

- Built an AI-powered healthcare risk prediction system using machine learning and structured healthcare data
- Developed an end-to-end ML pipeline covering preprocessing, data cleaning, feature engineering, model training, and evaluation
- Deployed the trained model through a Flask API with a live web interface for real-time risk scoring

Network Forensic Investigation & Evidence Management System

Python, Flask

- Developed a Python and Flask-based application to capture, analyze, and manage structured network traffic data
- Designed workflows for packet-level analysis, indexed evidence retrieval, and structured incident reporting
- Implemented chain-of-custody tracking to maintain data integrity, traceability, and reliable evidence management

Stock Market Fundamental Analysis System

SQL, Excel, Financial Data Analysis

- Analyzed publicly listed companies using SQL, Excel, and valuation metrics including P/E, EPS, ROE, Revenue Growth, and D/E Ratio
- Applied SQL queries and structured financial analysis to generate company-level insights and investment reports

EDUCATION

Ramco Institute of Technology

Expected May 2027

B.Tech in Artificial Intelligence and Data Science, Anna University

CGPA: 8.28/10.0 | Highest Semester GPA: 8.91 | Class XII: 87.67% (2023)

TECHNICAL SKILLS

Programming: Python, Java, HTML, CSS 3(Bootstrap) JavaScript, OOP, Data Structures

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Predictive Modeling, Feature Engineering, Model Evaluation

Data Analysis: Pandas, NumPy, EDA, Data Cleaning, Data Transformation, Data Validation, Excel, Power BI, Matplotlib

SQL & Databases: SQL, MySQL, PostgreSQL, MongoDB, Joins, Subqueries, Window Functions, Query Optimization, Database Schemas, CRUD

Data Engineering: ETL/ELT, Data Modeling, Star Schema, Snowflake Schema, Fact & Dimension Tables, Data Quality

APIs & Cloud: Flask, REST APIs, API Integration, CSV, JSON, AWS, Google Cloud Platform

Tools: Git, GitHub, Jupyter Notebook, Docker, VS Code, MySQL Workbench

ACHIEVEMENTS & LEADERSHIP

- First Place, Code Debugging Contest; Department Topper for three consecutive semesters
- Secretary, Neoteric AI Association – Led technical workshops and initiatives
- Joint Secretary, Department of Artificial Intelligence and Data Science

CERTIFICATIONS

Machine Learning Fundamentals – Infosys Springboard | **Python for Data Science** – Infosys Springboard

Data Analytics – NASSCOM FutureSkills Prime (Wipro) | **Cloud Computing Engineering** – NASSCOM FutureSkills Prime
